Education

LNMIIT jaipur Jaipur, Rajasthan
Btech in Electronics and communication engineering (ECE) *Aug. 2024 – May 2028*
CGPA: 7.79

Experience

Undergraduate Teaching Assistant August 2025 – Jan 2026
LNMIIT jaipur *Jaipur, Rajasthan*

- Assisted in conducting PPS lab sessions, helping students debug and understand core programming concepts
- Mentored students in C programming, focusing on logic building and problem-solving approaches
- Solved programming doubts and guided a batch of 150+ students on how to approach problem-solving in c language

UI-UX and web developer December 2025 – April 2026
Mentox technologies pvt. Ltd *Jaipur, Rajasthan*

- Designed and prototyped the Mentox website in Figma, building a cohesive design system and intuitive user flows
- Developed the website using React and Next.js, delivering a responsive, high-performance interface
- Enhanced user experience through strong visual hierarchy, clean layouts, and iterative design improvements based on feedback

Projects

Assistive Blind Automation System | *Python, Arduino, Embedded C, OpenCV , HTML , CSS , JS*

- Developed an assistive automation system to help visually impaired users navigate and interact with their surroundings
- Designed an intuitive interaction flow focusing on accessibility and ease of use
- Integrated sensors / automation logic to detect inputs and trigger real-time responses
- Focused on reliability and user safety through efficient system design and testing

Customer Segmentation & Predictive Analytics System | *Spigot API, Java, Maven, TravisCI, Git*

- Built an end-to-end data pipeline to clean, transform, and analyze large-scale customer datasets
- Applied clustering techniques (K-Means / Hierarchical) to segment users based on behavior and spending patterns
- Developed predictive models to forecast customer trends and identify high-value segments
- Visualized insights using interactive dashboards (Power BI / Python), enabling data-driven decision-making

1v1 Real-Time Coding Competition Platform | *React.js, next.js, mongoDB, websocket.io*

- Developed a real-time 1v1 coding platform enabling users to compete head-to-head in solving programming problems
- Implemented live code synchronization and matchmaking logic for seamless competitive experience
- Designed an engaging and minimal UI to reduce distractions and enhance focus during contests
- Optimized performance for low-latency interactions, ensuring fairness and smooth real-time updates

Technical Skills

Languages: C/C++, JavaScript, Python, SQL (PostgreSQL), HTML/CSS
Frameworks: React.js, Next.js, Node.js, Express.js, Material-UI
Developer Tools: Git, VS Code
Libraries: pandas, NumPy, Matplotlib , OpenCV , seaborn , react hooks
